

Dmitry Belyaev

Front-End Developer at Mail.Ru Group

blv.dmitry@gmail.com

Summary

First of all, I care about the quality of products I develop and work full-out to reach the best possible results still not forgetting about the business goals and deadlines.

Second of all, I like working in teams rather than making it alone all the time as it eventually leads to better decisions. Though I also used to work as the only front-end developer on the project.

The other thing is that I love beautiful design and believe it's not just about adding stock pictures and using best practices, but showing the character of the product to users. Which reflects in the product metrics.

Experience

Frontend Developer at Mail.Ru Group

September 2012 - Present (4 years 7 months)

Started as an html/css developer working on 12 media projects.

Currently a front-end developer focusing on Kino and Auto projects.

- Created UI kit (Fest, Stylus, Javascript) with shared codebase for desktop and mobile platforms which is used on all of our projects. Currently one of its leading maintainers.
- Developed and successfully launched mobile version of all projects within a year.
- Took part in redesigning of 3 projects.
- Launched a bunch of special projects. Some of them were mentioned by the local community and it/business news portals.
- Contributed to our handmade jQuery based Javascript framework

Frontend Developer at Avionero

April 2016 - January 2017 (10 months)

Worked on a prototype of a flight search web application. No team here, just me and the code :)

- Built a prototype of the service (React, Redux, Webpack, Stylus).
- Made an Express API for fetching SkyScanner search results.

Html / Css Developer at BigBuzzy

April 2011 - August 2012 (1 year 5 months)

- Released more than a thousand handmade html/css pages with unique designs.
- Developed a "bootstrap" for time optimization that made development two times faster.

Html / Css Developer at Ygo.ru

October 2010 - January 2011 (4 months)

- Took part in development of the ygo.ru website.
- Developed two online clothing shops.
